

# 2016 Lamborghini Aventador

## Nose Lift

Most Aventadors are equipped with a nose lift feature, which raises the front suspension to aid in loading the vehicle onto the carrier.

1

The nose lift switch is located in the switch panel above the climate control:

With the vehicle running, pull the nose lift switch down.

2

The yellow light in the instrument cluster will begin to flash. When the light stops flashing, the vehicle is fully lifted.

Fully dropped

Fully lifted
