

2024 Aston Martin DB12

Battery Conditioner

Battery Conditioner (Optional)

⚠ Caution: Do not attempt to start the vehicle with a battery conditioner connected to the mains supply.

If necessary, clean the charger socket before connecting the charger plug.

The Aston Martin battery conditioner is suitable for use on all types of 12 volt AGM and lead acid batteries. If this vehicle is not going to be used for a period of time, and mains power is available, use a battery conditioner to maintain the battery charge level. When connected, the battery conditioner will maintain a small trickle charge to keep the battery in a fully charged state. A battery conditioner is designed for conditioning of partially or fully charged batteries. It will not effectively charge a discharged battery.

The battery conditioner uses a magnetic disc to attach to the charger socket (A). To connect the battery conditioner, attach the charger plug onto the charger socket.

For further safety information and operating instructions, refer to the instructions supplied with the battery conditioner.
