

# Roadside Intake Client API

The data link that adds roadside assistance to your app

Agero's Client API powers the roadside assistance functionality within the mobile apps that millions of drivers rely upon every day. By providing a seamless data link between our systems and client systems, the Client API can also be used to enable roadside services in websites, voice assistants, text, and other emergent channels.

When you integrate the Client API within your brand's app, you're giving your customers the easiest way to find and request roadside help.

Available in all **Agero Roadside** programs.

## Client App Benefits

### Power Up Your App

Gives your customers a high-value reason to download your app, use it, and keep it up to date.

### Make Roadside Easy to Find

With roadside accessible directly through your app, no more having to search the web or glove box to find help.

### Deliver an Exceptional User Experience

Roadside events initiated through client apps consistently receive the highest customer satisfaction rating of any intake channel.

### Customer Benefits:

- + End-to-end digital access to roadside assistance
- + Customers can view providers' real-time status in the app
- + Customers can complete the request at their own pace

## About Agero

We are the leader in driver assistance services, safeguarding consumers on the road through a unique combination of platform intelligence and human powered solutions, strengthening our clients relationships with their customers. We protect 115 million vehicles nationwide in partnership with leading automobile manufacturers and insurance carriers, responding to more than 12 million requests annually. Our product ecosystem is powered by Swoop, a San Francisco based digital dispatch software provider we acquired in 2018. [To learn more, visit www.agero.com.](http://www.agero.com)
